Technical information:
Width: 4HP
Depth: 40mm
+12V max 55mA
-12V max: 41mA

Included in the box:
1x SCM-I03
2x 3M screws
1x Manual (which you're holding at the moment)

SCM-I03

Product Safety & Quickstart Guide

Stereo FX Return Module

3. Compliance & Legal Information
CE Compliance: This product complies with the European Electromagnetic Compatibility Directive (2014/30/EU) and the Low Voltage Directive (2014/35/EU), where applicable.
WEEE Compliance: This product must be disposed of in accordance with the Waste Electrical and Electronic Equipment (WEEE) Directive (2012/19/EU). Do not discard in household waste. Contact your local waste disposal authority for proper recycling options.
WEEE Registration Number: BE0729596089
RoHS Compliance: This product complies with the Restriction of Hazardous Substances Directive (RoHS) (2011/65/EU and amendment 2015/863). It does not contain restricted substances beyond the permissible limits.
Batch/Serial Number: This product is identified by the following version/batch or serial number:
AB2505SCMI0305.
This number is required for warranty claims and regulatory traceability in accordance with GPSR and CE compliance requirements.

Always disconnect power when installing modules, failure to do so could cause an electrocution hazard.
Do not spill liquids on the device. Should this happen, directly disconnect the power source, let dry completely and take to a qualified technician for inspection before powering up again.
Do not expose the mixer to temperatures above +50°C or below -20°C. If you have transported the instrument in extremely low temperatures leave it at room temperature at least an hour before powering up.
Never drop or have something drop on the mixer. Not only is that rather clumsy, it could also break things.
This mixer can, in combination with external amps and/or headphones produce sound levels that can damage your hearing. Don't work at loud levels for prolonged periods of time.
Skull And Circuits cannot be held responsible for any damage caused by improper operation.
WEEE & Environmental Safety
Dispose of this product according to WEEE Directive (2012/19/EU). Do not discard electronic components in household waste.

1. Product Identification
Product Name: SCM-I03
Manufacturer: Skull And Circuits
Address: Lindestraat 29, 1640 Sint-Genesius-Rode, Belgium
Contact Email: support@skullandcircuits.com
Website: www.skullandcircuits.com
2. Safety Instructions
This module is part of the larger SC Modular Mixer setup and should only be used as such. Follow the installation instructions carefully to ensure proper functionality.
It must only be operated in dry indoor environments Do not use these modules near or in water, such as bath tubs, Saunas, showers, swimming pools or similar spaces.
Before cleaning the device always disconnect from the power source, use a soft dry cloth, do not use liquid cleaners or a cloth that's too wet.
Make sure to connect the mixer and its elements to a suitable Eurorack power source as indicated. Powering it by other means may cause permanent damage.

Thank you for purchasing the SCM-I03 for your SC Modular Mixer setup. The SCM-I03 offers an easy way to handle stereo FX returns or be used as a simple stereo input into the mixing system. To make working with external, non-Eurorack, FX easier, such as FX pedals or 19" rack FX units, a line boost is integrated to raise the signal to Eurorack levels.
Inputs: The right input is normalized to the left input if you want to use a mono signal.
Lineboost: A 6db boost in gain for the selected input channel.
Vol: Allows you to set the volume level in the final mix.

Installation instructions:
Use the buss cable you got with the SCM-M03 to connect your SCM-I03 to your modular mixer setup. After this connection is made, use the provided M3 screws to install the module in your Eurorack system.
The module offers a VU output and Direct output on the back as well. Connect the appropriate module to these outputs.
